INTRODUCTION

THE BEGINNING OF A NEW DIGITAL ASSET ON SOLANA

Vior (Ticker: VIOR) is a Solana-based digital asset designed to merge real-world business profitability with blockchain technology. Instead of relying solely on speculation or hype, Vior is backed by tangible investments in diverse business sectors — ensuring long-term value creation and ecosystem stability.

Through strategic ventures in industries such as car rentals, real estate, perfumes, mobile applications, universities, and trading firms, Vior aims to build a portfolio of profitable assets that continuously fuel the token's growth and sustainability.

Our model is simple yet powerful: use collective investments to build real businesses — and use the profits from those businesses to support and grow the Vior token.

This unique integration of traditional business income with decentralized finance creates a hybrid ecosystem where investors and holders both benefit from real economic activity.

ECOSYSTEM & GROWTH MODEL

Vior's ecosystem is built on the principle of real-world profit generation and reinvestment. The funds raised through the private sale and presale will be strategically invested into profitable ventures owned or developed under the Vior ecosystem, including:

Car Rentals – Expanding regional and international rental operations.

Mobile Applications – Launching utility-based and lifestyle apps.

Real Estate Ventures – Developing and acquiring income-generating properties.

Perfume & Lifestyle Brands – Building unique retail and online brands.

Universities & Education Platforms – Investing in private educational ventures.

Trading & Prop Firms – Establishing trading capital funds for steady income streams.

MISSION

To launch a token on Solana that prioritizes accessibility and fairness.

To establish strong community and investor confidence through open communication.

To expand Vior's potential through strategic partnerships and utilities in the future.

ECONOMIC VISION

Vior combines blockchain transparency with real business profitability. By aligning investor interests with the ecosystem's success, Vior aims to create a self-sustaining growth loop — where business expansion drives token strength, and token strength fuels business growth.

TOKEN ROADMAP

Phase 1 – Foundation (Q4 2025)

- Token creation on Solana mainnet
- Website and social media launch
- Whitepaper release
- Private Sale

Phase 2 – Growth (Q1 2026)

- Public Presale
- Raydium listing and liquidity lock
- CoinGecko and CoinMarketCap listings
- Marketing campaign

Phase 3 – Expansion (Q2–Q3 2026)

- Airdrops and partnerships
- CEX listings
- Community roadmap update

TOKENOMICS

Token Name: Vior

Ticker: VIOR

Total Supply: (10 Billion)

Network: Solana

Decimals: 9

Type: SPL Token

SALES STRUCTURE

Private Sale

Purpose:

Raise initial funding for marketing, development, and liquidity setup.

Access:

Invitation-based.

Price:

Discounted rate for early participants.

Vesting:

Short lockup to ensure stability.

Presale

Purpose:

Public access before listing.

Platform:

Hosted directly on the official Vior website.

Accepted Currencies:

SOL and USDC

Distribution:

Sent to Solana wallets after presale ends.

Use of Funds:

Liquidity creation, marketing, and ecosystem reserves.

ALLOCATION
